

Adopt An Animal!

Bridges For Brain Injury, Inc.

Adopt A Wildlife Education Program Animal!

You can help us provide for the care and feeding of our Wildlife Defenders program animal ambassadors by sponsoring an animal for one year through our Adopt An Animal program.

Any animal ambassador can be adopted, from rare and unusual insects, New Guinea Stick Bugs to Bridget the African Porcupine, Boomer the Wallaby and many more!

In return for your donation, we will send you or your gift recipient the sponsorship package that accompanies that particular gift level.

Providing services to adults with brain injuries; bridging the gap between surviving and living lives of dignity and hope.

The Adopt-an-Animal program is perfect for many occasions: birthdays, holidays, anniversaries, businesses, school and club fundraising programs, and more. Anyone can adopt an animal – individuals, families, school groups (special packages available), businesses, or social service clubs.

For more information or to adopt: www.wildlife-defenders.org

Adoptions last one year and are renewable.

Due to their popularity, some animals may be subject to concurrent adoptions.

No ownership rights are transferred.

Any animal we currently have is available for adoption.

If you have any questions or need help with your animal adoption, please contact Wildlife Defenders at (585) 396-0070.
